

General End User Photon Training Announcement

Get Trained on Photon: Our new secure, HIPAA compliant software communication system that will be used for all consults.

Photon enables providers to safely view and collaborate on patient PHI including radiology studies and reports, vital signs, labs, transcriptions, and demographics, as well as user-generated photos/video. __Hospital X's__ proprietary Photon network will allow medical staff members to communicate with other registered users.

Photon is absolutely free of charge to all members and can be used on your iOS and Android devices as well as any computer.

The hospital will provide all required Photon training. On average, the typical user needs no more than 15 minutes of familiarity with Photon to become proficient, and can begin to actively employ it in treating patients.

The Photon team will be on site the following dates:
_____ to ensure proper training and implementation empowering you to leverage this exciting new technology to its fullest potential.
iPhone users, be prepared with your Apple ID.

- Just reply with the following to schedule a 15 min appointment to register!
 1. Name & Credentials
 2. Department
 3. Specialty or Job title
 4. Email
 5. Cell phone #
 6. Preferred date and time

We are confident you will find Photon simple and easy to use, and technology that does not get in the way of healthcare.

Sincerely,
